

## PRODUCT FEATURES

Google Maps Interface

Give info about the class and professor

Directions to the class and classroom

tells you about available parking nearby

gives info about how busy different places are on campus (dining halls, russell house, etc.)

List of campus resources available to students and how to contact them

## HURDLES

Having live updates on things like traffic and wait times

Getting access to different campus' information and layouts

Getting the entire university to convert to using this app

Mass integration into colleges around the country would take a long time

Pricing/Investors

Schools would pay for the product, that would then be free for the student

all software could be linked to the app, inciting other developers to get on board

## APP LAYOUT/STRUCTURE

can make a calendar and reminders of assignments and important dates on syllabus

map with accurate walking directions

Search bar in the app to find a solution to your specific problem

separated into academic section, map section, food section, etc.

professors can use the app to send out notifications to students

ability to chat with professors through the app

## PROBLEM/PROBLEM STATEMENT

New students are having issues adjusting to college and need a more simplified way to get assistance around campus.

## SOLUTION/PRODUCT EXPLANATION

would essentially be a one stop shop for any problem you possibly come across at college
